Phạm Trung Đức

Backend Developer

0329255823 ptrungduc1011@gmail.com https://phamtrungduc.info Hà Nội

WORK EXPERIENCE

FPT Software Sep 2025 - April 2026

Back End Developer

- Built and maintained RESTful APIs to support features and seamless client-side integration
- Maintained and improved existing code to ensure system stability and support new feature requirements
- Participated in Agile-based development, collaborating in sprints, daily stand-ups, and iterative feature delivery.

SKILLS

C# Core	OOP , SOLID principles , LINQ , Design Patterns , Clean Architecture
Framework	.NET Core , ASP.NET Core , RESTful API , Entity Framework
FrontEnd	HTML , CSS , Bootstrap , JavaScript , ReactJS
Database	SQL Server , PostgreSQL , Redis
Real-Time / Messaging	SignalR , RabbitMQ , Worker Service
Tools/DevOps/Testing	Git , Docker, Docker Compose ,CI/CD (Jenkins) , Postman , Agile Scrum ,xUnitTest

PROJECTS

Food Ordering Microservices Dec 2025 - July 2026

Link source : https://github.com/khongphaiduc/food-ordering-microservices-ddd

- **Role :** Solo Developer
- **Tech Stack:** ASP.NET Core ,Web API ,gRPC, EF Core, SQL Server, PostgreSQL, MinIO, Redis, RabbitMQ ,JWT, ReactJS

Key Features

- Designed and implemented **concurrency-safe inventor**y management using atomic database operations, ensuring data consistency during high-volume order processing
- Engineered a **Choreography-based Saga** to coordinate distributed transactions across Order, Inventory, Payment, and Cart, leveraging **Inbox/Outbox,** idempotency, and compensating actions to achieve reliable event processing and eventual consistency
- Designed and implemented a reliable PayOS payment flow using **Idempotency Keys** to ensure duplicate requests are not processed multiple times, with webhooks for payment verification and real-time order status synchronization
- Developed a real-time order management system with SignalR, allowing staff to instantly receive and handle new orders, significantly improving operational responsiveness.

Hotel Booking Management System Aug 2025 - Dec 2025

Link source : https://github.com/khongphaiduc/hotel-manager-booking

- **Role :** Solo Developer
- **Tech Stack:** C# , ASP.NET Core Web MVC, EF Core, SQL Server, Redis, RabbitMQ,OAuth2 , HTML , CSS Bootstrap.

Key Features

- Built a full-stack hotel booking system with secure authentication (Google OAuth2, cookies) and role-based access control
- Designed and implemented room, booking, and service management modules with real-time status updates.
- Integrated online payment gateways (VNPAY, PayOS) and automated background tasks for booking lifecycle handling.
- Implemented **Redis-based distributed lock** to resolve **race conditions** and **prevent overbooking** during high-concurrency periods.

Impact

- **Implemented Redis** caching for frequently queried room lists, reducing database calls and **improving API response times by 66%** in performance tests.
- Reduced booking API response time **from ~3–5 seconds to under 1 second** by offloading email sending to **RabbitMQ-based** background processing.

CERTIFICATIONS

IELTS 6.0 2025

EDUCATION

FPT University 2022 - 2026

Software Engineering
